Employee Clearance for Mask Use

RESPIRATOR MEDICAL EVALUATION QUESTIONNAIRE

Respirators must be used in workplaces in which employees are exposed to hazardous airborne contaminants (OSHA guidelines). When respiratory protection is required, employers must have a respirator protection program, as specified in OSHA's Respiratory Protection standard (29 CFR 1910.134). Before wearing a respirator, workers must first be medically evaluated using the mandatory medical questionnaire or an equivalent method. To facilitate these medical evaluations, this **INFOSHEET** includes the mandatory medical questionnaire to be used or the evaluations.

If your employees are wearing respiratory masks such as an N95 mask while working, they must have a medical evaluation form reviewed by a physician to stay in compliance with OSHA guidelines.
